

Dear Sir/Madam,

Thank you for your recent enquiry regarding the **Outback 2.0 mtr** Pop Top Slide On.

We at Islander Campers have much pleasure in enclosing the requested information on our pop-top slide on campers.

**Superior quality, strength, finish and choice are some of the most important points covered in this letter.**

We offer two options for you to consider prior to making your purchasing decisions. Option one is to purchase one of our standard designs as per the enclosed floor plans. Option two is to fully custom design to your requirements.

The pricing of the standard designs is enclosed and the cost of a custom designed unit would be dependent upon your requirements and would be finalised prior to ordering.

**Please note an additional cost will be incurred for vehicles over standard hurdle height, as additional material is required.**

Our new method of manufacturing slide on and built on campers is the sandwich panel. The panel consists of a fibreglass interior and exterior skin with an insulating structural core, not cheap isolite, (white styrene).

**Unlike most other manufactured panels or moulded fibreglass units, our panel has no fibreglass odour due to the method with which it is manufactured.**

The panels are exceptionally strong, lightweight, easily repairable and impervious to water damage therefore creating a far superior product to what was previously available, or what almost all other manufacturers currently use. Our panel is not just a fibreglass sheet covering a frame or ply sheeting.

**The problems of frame fracture, rot, rust and oxidation are now a thing of the past, it is impossible for these common manufacturing deficiencies to occur using our panel.**

Our **aerodynamic design** and structure is unique to Islander Campers and adds to the overall strength and aesthetic look of the camper.

Our customers have the option of choosing their own colour scheme, which includes vinyl, cushions and curtain material, laminates (benches etc.) and trim. Another option is to guide us in your preferred colour tones, and then we can coordinate the colour schemes on your behalf.

Our base model floor dimensions for the Outback 2.0 metre pop-top slide on are 2000mm x 2050mm. The internal height (with the top up) is 1950mm and with the top down the slide on

height measures 1780mm (external). The size of the **innerspring mattress** is 6'2" X 4'; these measurements can be changed with the custom designed units. The door size in the pop- top slide on is 1420mm high and 622mm wide. The bed area is very roomy when the pop top is up, plenty of room to sit up.

Enclosed is a comprehensive options list. This list is used to alter or add to your camper. For example, if you required extra lighting, you would simply tick the appropriate box, which allows us to give you an exact cost of your camper. In the event you require an addition that is not on the options list, please feel free to list the requirement under the extras heading.

Our basic cost includes Hijacker individual hydraulic lifting legs. Each leg is capable of lifting 2000lb and is extremely easy to operate as well as requiring less maintenance and a reduced chance of future problems to repair. A comprehensive list of spare parts is available and the legs are quite simple to repair, if required.

The total dry weight for the Outback 2.0 metre base pop-top slide on is approximately **560Kg** and the fitting of any options may increase the overall weight.

When purchasing a vehicle please note that there are legal limitations to the size of campers that may be carried. The vehicle measurement sheet that is enclosed with your information will allow you to determine the legal capacity of the vehicle of your choice.

Our standard slide on campers can be fitted to any flat tray vehicle, either two or four wheel drive, and our custom built units can be made to suit any vehicle, flat tray or ute back styles.

We at Islander Campers take pride in our workmanship and therefore offer a two-year warranty with our pop-top units. We are always open to new ideas or suggestions and look forward to any challenge.

With this in mind we sincerely look forward to being of assistance to you with your slide on requirements. If you would like any further information or wish to inspect one of our completed units, please do not hesitate to contact us.

Yours faithfully

Danny Gower
