

Dear Sir/Madam,

Thank you for your recent enquiry regarding the **Prestige 3.0 metre Pop Top Slide On**.

We at Islander Motor Campers have much pleasure in enclosing the requested information.

We offer two options for you to consider prior to making your purchasing decisions.

Option one is to purchase our standard design as per the enclosed floor plan.

Option two is to fully custom design to your requirements.

The pricing of the standard design is enclosed and the cost of a custom designed unit would be dependent upon your requirements and would be finalised prior to ordering.

Please note an additional cost will be incurred for vehicles over standard hurdle height, as extra sandwich panel is required.

Our new method of manufacturing slide on and built on campers is the sandwich panel.

The panel consists of a fibreglass interior and exterior skin with an insulating structural core, (not isolite, white styrene).

Unlike most other manufactured panels or moulded fibreglass units, our panel has no fibreglass odour due to the method with which it is manufactured.

The panels are exceptionally strong, lightweight, easily repairable and impervious to water damage therefore creating a far superior product to what was previously available, or what almost all other manufacturers currently use. Our panel is not just a fibreglass sheet covering a frame or ply sheeting.

The problems of frame fracture, rot, rust and oxidation are now a thing of the past, it is impossible for these common manufacturing deficiencies to occur using our panel.

Our customers have the option of choosing their own colour scheme, which includes vinyl, cushions and curtain material, laminates (benches etc.) and trim. Another option is to guide us in your preferred colour tones, and then we can coordinate the colour schemes on your behalf.

The Prestige base model floor dimensions are 3000mm x 2150mm. The internal height (with the top up) is 2000mm and with the top down the slide on height measures approximately 1800mm (external including hatch). The approximate dimensions of the shower in the 3.0 metre slide on are 1000mm x 750mm. A swivel Thetford cassette toilet is fitted in this shower.

The **innerspring mattress** size is 6'2" X 4'. These measurements can be changed with the custom designed units. The door size in the pop- top slide on is 1420mm high and 622mm wide. Please note that the bed dimensions do allow a double size mattress 4'6" x 6'2" and plenty of head room to sit up in bed.

Enclosed is a comprehensive options list. This list is used to alter or add to your camper. For example, if you required extra lighting, you would simply tick the appropriate box, which allows us to give you an exact cost of your camper. In the event you require an addition that is not on the options list, please feel free to list the requirement under the extras heading.

Our **aerodynamic design** and structure is unique to Islander Motor Campers and adds to the overall strength and aesthetic look of the camper.

Our basic cost includes Hijacker individual hydraulic lifting legs. Each leg is capable of lifting 2000lb and is extremely easy to operate as well as requiring less maintenance and a reduced chance of future problems to repair. A comprehensive list of spare parts is available and the legs are quite simple to repair, if required.

The total weight for the 3.0 metre base Prestige pop-top slide on is approximately **950Kg** and the fitting of any options may increase the overall weight.

When purchasing a vehicle, please note that wheel base will vary the size of the slide on camper we are legally permitted to place on the vehicle. In the event that you require a vehicle that cannot take the size slide on you require, please feel free to enquire about the lengthening of the chassis to allow a larger slide on camper to be fitted correctly.

Our standard slide on campers can be fitted to any flat tray vehicle, either two or four wheel drive, and our custom built units can be made to suit almost any vehicle

We at Islander take pride in our workmanship and therefore offer a two-year warranty with our pop-top units. We are always open to new ideas or suggestions and look forward to any challenge.

With this in mind we sincerely look forward to being of assistance to you with your slide on requirements. If you would like any further information or wish to inspect one of our completed units, please do not hesitate to contact us.

Yours faithfully

Danny Gower
